

The Magic Seeder – Makes Seed Sowing Simple

A guide to using 'The Magic Seeder' by Philip Hunt from
Magic Seeder Ireland

www.magicseederireland.com

'The Magic Seeder' is a new product to horticulture, It is used by the Royal Horticultural Society and was the winner of the award for the BEST NEW RETAIL PRODUCT at the 2004 South West Regional Growers Show in Exeter.

In June 2009 Magic Seeder Ireland were pleased to be appointed the sole rights for wholesale distribution for 'The Magic Seeder' in Ireland, The Magic Seeder will be available through many outlets, due to this all stockists are listed by County in the ROI Stockist and links Page, we have done this to ensure that you the retail customer can be confident that you are purchasing the original Magic Seeder and not a cheap counterfeit version, We have supplied all outlets listed on our stockists page with the original Magic Seeder.

'The Magic Seeder' is a must for all gardeners both amateur and professional, which is sure to become a treasured favourite in any gardeners' toolbox

The concept of the seeder is based on the same principle as automatic seed dispensing machines, as used by large commercial seed growers.

'The Magic Seeder' takes the guess work out of seed sowing. Get perfect straight lines, and prevent seeds clumping together.

Ideal for older gardeners with dexterity problems as its robust body makes it really easy to grip in your hand.

The spring loaded plunger lets you accurately dispense seeds of a wide range of sizes. (Not suitable for the very finest seeds such as Lobelias).

'The Magic Seeder' is a simple to use and extremely efficient hand held seeder.

'The Magic Seeder' can be used to sow seeds of all shapes and sizes up to 2 mm, like a professional grower, making home seedling production easy.

'The Magic Seeder' is ideal for accurate sowing of seeds in plug trays, pots or seed trays.

'The Magic Seeder' stops seed wastage and time consuming thinning out, as you are now using the same sowing technique as commercial nurseries.

'The Magic Seeder' is used by the Royal Horticultural Society.

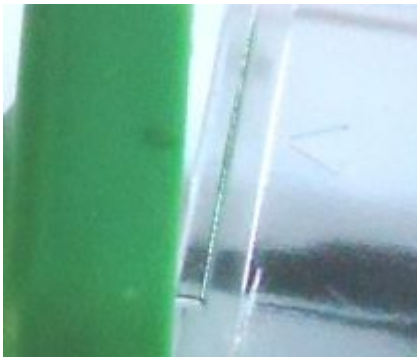

'The Magic Seeder' is an essential tool for all gardeners.

How To Use

'The Magic Seeder' is a very easy to use seed sowing tool, it only takes 4 easy steps to be using 'The Magic Seeder', before taking the seeder apart it is a good idea to examine the seeder especially the black plunger where you will notice a groove in it that gets longer when you press the plunger, this is where the seeds will dispense from, also take note of the 2 marks that have to be aligned up on re-assembly of the seeder.

Before using 'The Magic Seeder' ensure that any seeds are dry and that the inside of the seeder is dry as well.

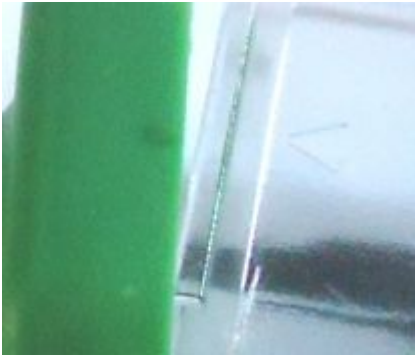

1, Prise the green cap from the square seed holder, paying attention to 2 marks one on the green cap and the second a triangle on the square seed holder.

2, Add seeds directly from the seed packet. Do not overfill.

3, Replace the green cap lining up the mark on the green cap to the triangle mark on the square seed dispenser.

4, To distribute the seeds hold the seeder with the lining up marks at the same side as the ends of your fingers this way when you sow the seeds you will see the groove in the black plunger that the seeds travel down, Hold the seeder at an angle and lightly press the plunger.

Adjustment is made by varying the angle and the pressure on the plunger. Each time you change the seeds try out the seeder over a sheet of paper to ensure correct distribution without wasting any seeds
